FIELDBOSS FUNCTIONALITY

CUSTOMER SERVICE & CASE MANAGEMENT

- Easily distribute inbound requests for sales and service. Capture customer needs and assign them to the correct individuals internally.

ESTIMATING & QUOTING

- Achieve the margin you expect on maintenance and project work, by integrating estimates and quotes into your sales and delivery processes.

SERVICE AGREEMENTS

- Efficiently quote, track, and manage maintenance contracts and renewals. Automatically schedule maintenance in the service calendar and report on contract revenue, cost, overhead, margin, and profit.

PROJECT MANAGEMENT

- Comprehensive project management functionality. Track all tasks associated to a project and track real-time profit from billings, labor, material, and subcontractor costs.

SCHEDULING & DISPATCH

- Detailed service calendar allows you to efficiently schedule staff. Integrated dispatch capabilities ensure on-demand service and break fix requests never “fall through the cracks”.

WORK ORDER MANAGEMENT

- Manage work order profitability up to the minute with variance calculations against an estimate and allocate labor costs across departments.

ELEVATOR EQUIPMENT TRACKING

- Track elevator equipment detail, service history, parts used, maintenance contracts, and documentation. View elevator locations on a map.

MOBILITY IN THE FIELD

- Real time two-way interface with any device for instant access to information like entry of time tickets, work orders, mapping, signatures, notes, and pictures.

PAYROLL & ACCOUNTING

- Financial reporting, budgeting, forecasting, and consolidations. One click transfer of work orders, timesheets, and parts used.
